

HOW TO NAVIGATE AROUND CAMPUS ON MOVE-IN DAY

Aug. 17, 2023

MOVE-IN DAY INSTRUCTIONS

Coming from the South

Head west on Route V from Business 71/Main Street until you reach Icon Road. Head North on Icon Road until you reach directional signage that will guide you to your housing facility.

Coming from the North

Head south on Icon Road until you reach College Avenue. Head east on College Avenue until you reach directional signage that will guide you to your housing facility.

Drop and Go Zones

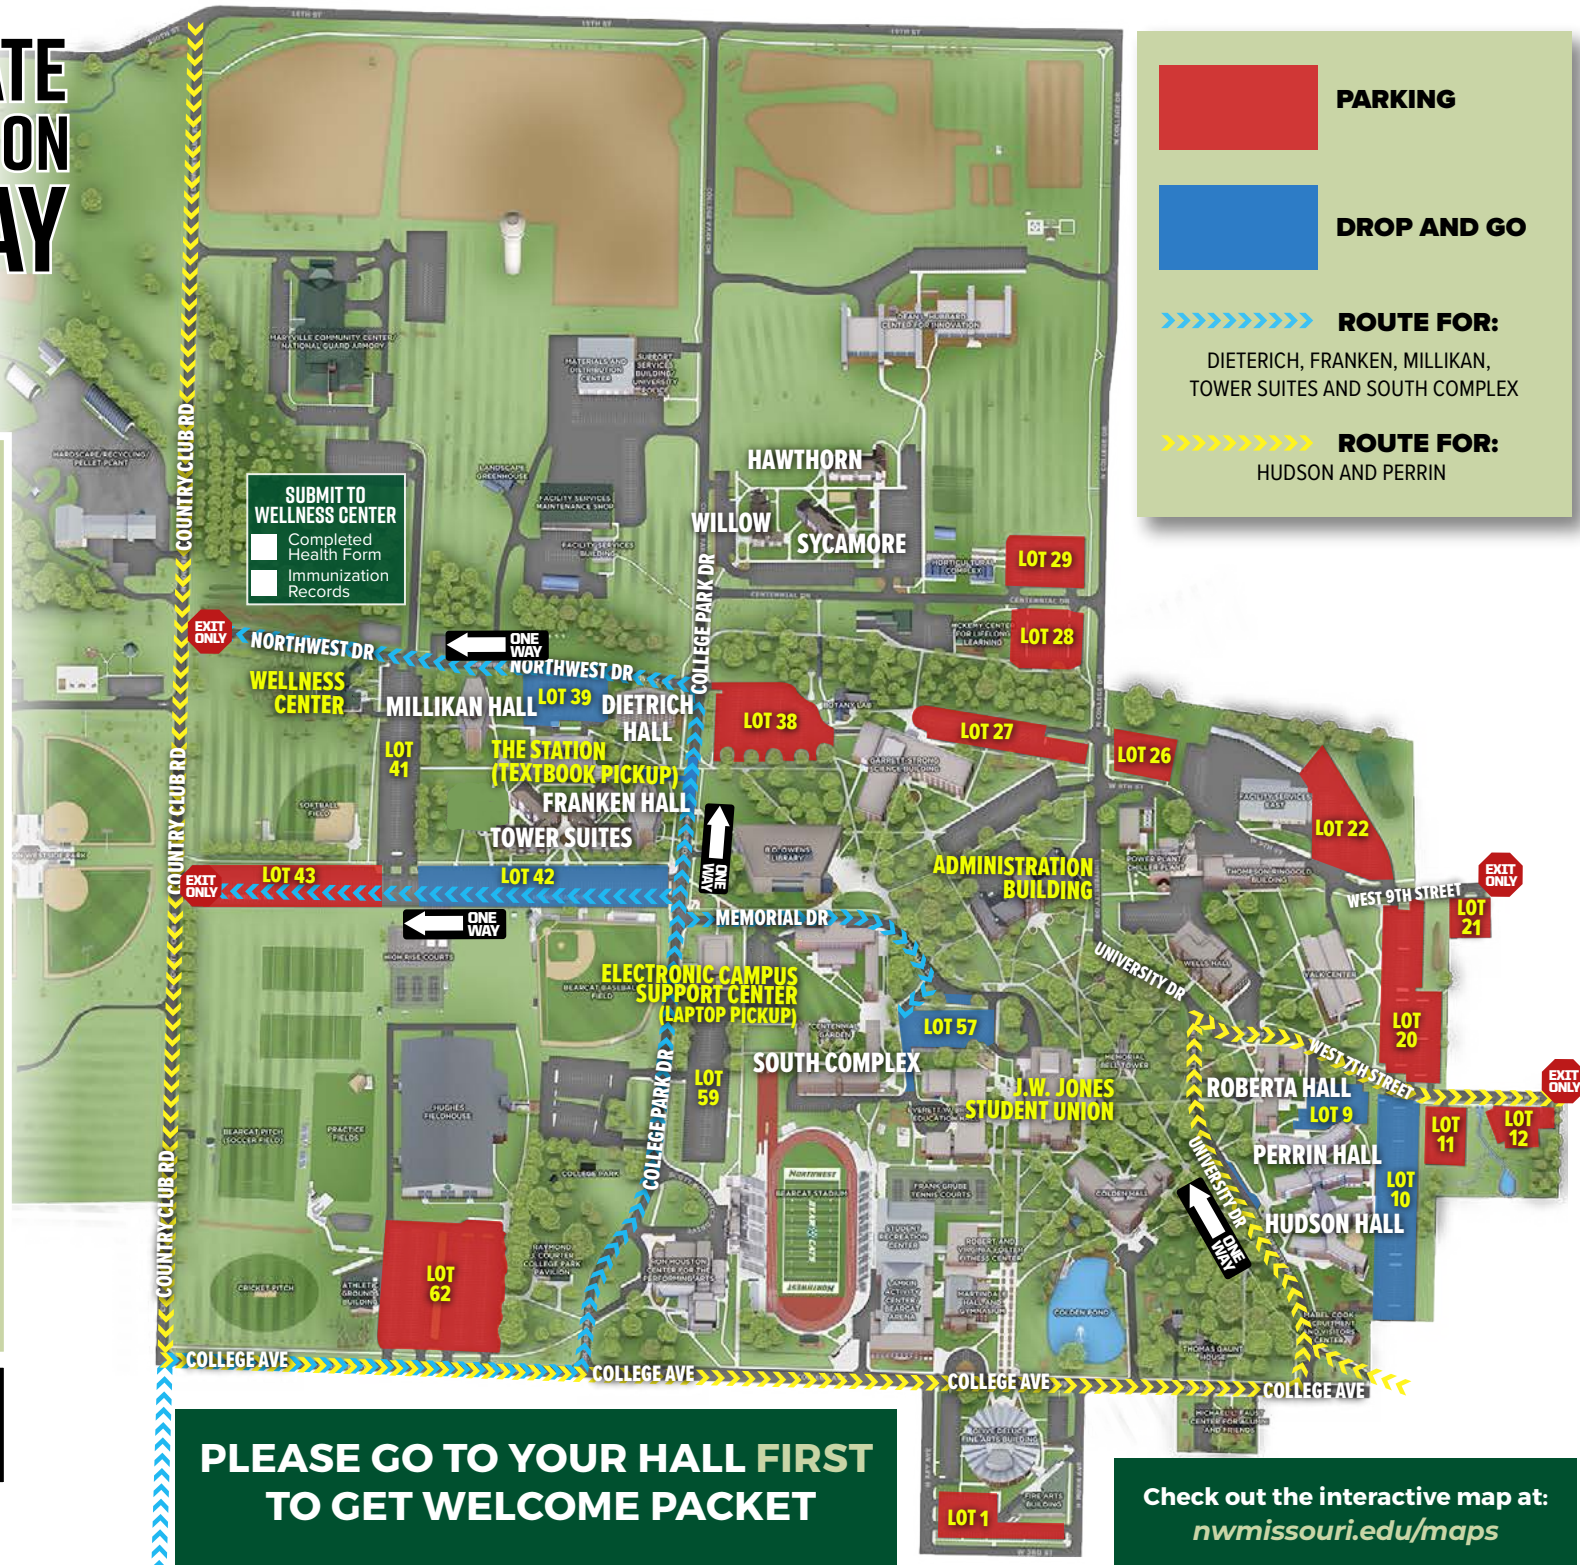

The zones are used for unloading student belongings. Please unload all items from your vehicle(s) onto the curb while in the zone, and then move your vehicle to an appropriate parking spot. 'Cat Crew members will be available to assist with unloading of materials.

Exit campus through Lot 42, Northwest Drive, West 7th Street, and West 9th Street

Please park in the red lots. This will assist with traffic flow and allow others ample space to move in.

MOVE-IN DAY INCLEMENT WEATHER

Severe Weather Threat: Whenever lightning comes within 8 miles of Northwest Missouri State University:

1. All move-in day activities will be suspended for minimum of 30 minutes
2. Northwest will communicate the suspension of move-in day activities via the following mediums:
 - Bearcat Alert
 - Northwest Social Media
 - Residential Life Social Media
3. Students and parents currently on campus will shelter in their assigned building, or the nearest available University building
4. All incoming students and parents will be instructed to delay their arrival in accordance with this procedure and best safety practices
5. Move-in day activities will resume upon the direction of University Police or the University's Emergency Management Coordinator

Reference: Lightning Evacuations for Outdoor Activities Annex L – Appendix 3

- The University directive is to suspend or terminate any outdoor activity when approaching lightning comes within 8 miles of the event (flash-to-bang time of 40 seconds or less) to account for evacuation times.
- The National Severe Storms Laboratory (NSSL) and the NCAA recommend that all individuals should be out of outdoor event sites and in appropriate shelter PRIOR to lightning coming within 6 miles of the event (flash-to-bang time of 30 seconds or less).
- The notification distance may be increased depending on the time of day and the speed of approaching weather conditions.
- The duration of the evacuation shall not be less than 30 minutes after the last lightning occurrence within 6 miles (flash-to-bang time of 30 seconds or less).
- Reentry into the evacuated area will begin when it is declared safe by University Police or the University's Emergency Management Coordinator.

COMMUTER RECOMMENDATIONS:

Commuters are not required to be here this day.
