Fire Safety

In the event of a fire, the emergency system will flash strobe lights and sound an alert throughout the building. When this happens please, stop what you are doing and listen to the instructions. During the fire alarm students are instructed to go outside using the nearest exit and walk far away from the building. Remember, elevators should not be used during a fire alarm.

Students are to wait outside the building until a University staff member gives the all clear to go back into the building. When there is an all clear students may re-enter the building. Because of the high volume of students entering the building at once, students should use the stairs to go back to their floor instead of the elevator.

It is also important not to tamper with any fire equipment or cause false fire alarms. Doing so is a violation of the law and will be reported to University Police.
