What’s New in Environmental Services

Update Recycling Bins
In response to an Advanced Media class recommendation to make campus recycling containers more recognizable, the Recycling Committee with the assistance of University Relations and the Sign Shop has put together a new look for our campus recycling stations. They will appear first in the Union and then hopefully expand to the rest of campus. This facelift will cost about $50 per bin, allowing us to refurbish more than 12 bins for less than the cost of replacing one.

Summer Class Info

Summer Classes for Session 3
7/5—7/29

Summer Classes for Session 4
8/1—8/15

June Recognitions

The following people were recognized during the month of June for having a quality of 96% or better.

June Thrive Winner
Al Hoover was the $25 winner.

Quote of the Month
Good habits are as easy to form as bad ones.
- Tim McCarver

Safety Tip
Never Delay….Report hazards or injuries right away.

The Temperature Control Department consists of four full-time employees and one student employee. The full-time employees are: Robert Redig, Supervisor; Joe Gellar, Technician; Bob Schackelford, Technician; Curtis Sybert, Technician; and Callum Woods, student. Their office is located in the Chiller Plant (brick building northeast of the Power Plant). The Temperature Control shop is responsible for maintaining the chilled water heating and cooling on campus. This is mainly controlled at the Chiller Plant by computer. These computers are monitored and updated daily. Water is tested and treated on a daily basis for chemical treatment on the chiller towers and water loops. The Chiller Plant employees also take care of the refrigeration and ice machines on campus.

On July 25th, Jim Daniels was presented two awards for being a great supporter of the Missouri National Guards. Colonel Greg Mason, Lt. Col. John Parker, along with CSM Sportsman presented the awards to Jim. One was the Patriot award from the Employer Support of Guard and Reserves and the other was a letter of appreciation from the 110th Maneuver Enhancement Brigade for the support that the University gives the National Guards and allowing their soldiers to serve and support their country.

Command Sergeant Major John Sportsman, who has been in the National Guard for 31 years is an employee under Jim Daniels. John had recently been activated for a third time on State Emergency Duty for flooding since June 6th. John also spent a month in Louisiana for Hurricane Katrina, twice to San Antonio Texas for Noble Eagle II and also an eighteen month deployment to Kosovo. John appreciates the support he receives from Jim and Northwest Missouri State University.
