eCollege Course Management System Software:

eCollege Course Management System software is Northwest Missouri State University's campus-wide course management software (CMS). Course sites should be requested by the faculty member in the Faculty Create-a-Course Request form. The eCollege CMS is offered in eCompanion format for campus-based, web supplemented courses and for blended courses and the eCourse format for online courses. A variety of tools and techniques are provided through the eCollege CMS including authoring and content development tools, e-mail, chat, web conferencing, document sharing, dropbox, weblibliography, and gradebook.

eConferencing Software -- ClassLivePro (Elluminate):

ClassLivePro is a web conferencing software available through eCompanion and eCourse course sites. It must be requested by the faculty member in the Faculty Create-a-Course Request form or via e-mail to the CITE Office.

ClassLivePro is powered by Elluminate software which creates a virtual, collaborative classroom environment using an interactive whiteboard. Basic functionality includes audio, video, interactive whiteboard, chat, application/document sharing, and moderator/participant tools.

Impatica for PowerPoint

Impatica for PowerPoint is a software conversion tool. Impatica takes a PowerPoint presentation and compresses it to a much smaller size than the original. Impatica works great for narrated PowerPoints which are usually too large to post on the Internet. Impatica also creates a Java-based streamer which will stream the compressed presentation file over the Internet. Learn more about Impatica.

Classroom Presenter

Classroom Presenter, an integral part of Conference XP, is a free software package developed by the University of Washington. The software provides a faculty member, using a Tablet PC, with a wide range of high quality pen styles and colors to annotate PowerPoint-based presentations or empty whiteboard slides. Marked up slides (known as decks) may be saved for later distribution to students.

Captivate and Camtasia

Captivate and Camtasia are special software to capture images from the computer screen. Captivate works great to create tutorials of software programs or to demo through a process.

These tools can be used in the CITE Office or have our staff create a product for your use. Learn more about Captivate and Camtasia.

Turnitin

The CITE office provides Northwest faculty and students with Turnitin's plagiarism prevention software. This product may be used to check whether submitted Microsoft Word files contain plagiarized materials. Every paper submitted is returned in the form of a customized Originality Report. Results are based on exhaustive searches of billions of pages from both current and archived instances of the internet, millions of student papers previously submitted to Turnitin, and commercial databases of journal articles and periodicals.

eInstruction

There has been growing interest among faculty across the Northwest campus to utilize an electronic student response system (clickers) within their classes. These systems can be used within a class to promote an interactive environment by allowing students to answer multiple choice and numeric response questions. Instructors can actively engage the students during the entire class period, gauge their level of understanding of the material being presented, and provide prompt feedback.

Elluminate Live

Elluminate Live is our tool to pre-record learning sessions and have available as 'view-on-demand' learning objects. Our license with Elluminate allows us 10 virtual rooms for recording.

Rooms will be assigned to faculty working on recording content for a course. Contact the CITE Office for room availability and training in Elluminate Live.

Northwest Video

Northwest Video is a video repository website where Northwest faculty and staff can securely and easily upload video content. Northwest faculty and staff automatically have accounts with the system and can use it immediately. The site provides a clean and simple interface to upload a video and also provides a video player that can easily be embedded within an eCollege course site to allow students to view content. Northwest Video is a video storage site, NOT an open, social website where anyone can browse through and watch any video. It is left up to you to make videos available to students by embedding within eCollege course sites. Content posted within Northwest Video is secure and not available to the general public.
