• New Student Orientation and Registration
  · Attend orientation to register for classes and learn about campus
  · Get your Bearcat ID card, attend a short orientation presentation, meet with a faculty advisor to register for classes and tie up any loose ends with residential life, admissions, financial aid, etc.
  · Information about orientation and registration will be sent via email and mail
• Spring registration dates are held in November and December
• Fall registration dates offered in April, May, July, and August
Northwest is a transfer-friendly institution!

1. We accept credit from ALL regionally accredited institutions
2. Courses may not be developmental or remedial in nature
3. You may transfer an unlimited number of credit hours

Vocational and technical credit may only be used for the Bachelor of Applied Science degrees.

Contact a transfer advisor for additional questions.
transfer@nwmissouri.edu

Joint Admission - Northwest has Joint Admission partnerships with Southwestern Community College and Metropolitan Community College in Kansas City.

- Bearcat card
- Access to Northwest events
- Personalized Northwest advisement
- Free transcript sharing between institutions
ASSOCIATE Degrees
ASSOCIATE DEGREE

- I am going to complete my associate degree before I transfer.

How will that affect me?

An Associate of Arts will waive all Northwest Core requirements except for digital literacy and directed courses in professional programs.

An Associate of Science satisfies the eligibility requirements for the Bachelor of Science, but will not automatically waive any requirements.

An Associate of Applied Science satisfies the eligibility requirements for the Bachelor of Science, but will not automatically waive any requirements. Courses will be evaluated on an individual basis.
BACHELOR OF Applied Science

If you have completed a vocational or technical certificate, an Associate of Applied Science or technical Associate of Science, you may be eligible to pursue a Bachelor of Applied Science at Northwest. You can transfer vocational and technical coursework from a regionally accredited institution that may not be transferable towards a Bachelor of Arts or a Bachelor of Science. Additionally, the curriculum requires fewer Northwest Core courses and allows you to choose an emphasis in agriculture, applied computing, child and family studies, food service, geographic information systems, geography, information technology, marketing/management or computer business application.
Benefits of MRT:

1. Earn your associate degree while taking courses toward a bachelor’s degree.
2. Gain an extra credential that may help you earn higher pay and advance in your career.
3. Waive your Northwest Core requirements.

For more information, contact Brady Willis at bwillis@nwmissouri.edu or 660.562.1804.
LET’S GET STARTED!

- Complete the FREE online application
- Submit all official transcripts to the Office of Admissions

Ben is career ready day one.

Ben Wolff | Senior | Hometown: Kansas City, Missouri
Major: Computer Science

- Completed six internships with Cerner, a healthcare tech company in Kansas City
- Took an active role as a student leader during his first year on the campus
- Established the Cyber Defense Club
- Served as the president of the Association for Computing Machinery
Hannah describes Northwest and Maryville as accepting communities. The University continues to evaluate partnership opportunities: develop methods to enhance diversity, equity and inclusion on campus; and prepare students for successful careers and life after graduation.
Brianna Daniels | Hometown: Odessa, Missouri
Major: Communication and Mass Media

As a first-generation college student, Brianna was nervous about attending college, but understood the importance of earning a college education. She took advantage of the profession-based opportunities in the School of Communication and Mass Media such as hosting, producing and broadcasting on KNWT.

“When the Bearcats went on to win their national title for basketball, we got to film the regional tournament. It was just really exciting to work on something on a large scale and know that so many people were watching.”
