

The **Bachelor of Science in General Studies** is an online or on-campus, adaptable degree aimed at the working professional who wants to continue working while earning an undergraduate degree. It is also suitable for students who have an unclear career path. The degree is multidisciplinary, allowing students the opportunity to explore their interests in unique and innovative ways. Students can choose from emphasis areas including but not limited to accounting and finance, business management, education, geography and geographic information science, health and physical education, marketing, and nursing. Students have the option to create their own emphasis area(s) through a proposal process with their academic advisor.

Comprehensive majors do not require minors. Advanced-level courses (300-level or higher) should be chosen with Advisor counseling. Students must have 32 credit hours of coursework at the 300-level or higher.

This Four-Year Plan is meant to supplement your **Degree Audit**. You should work with your academic advisor on a regular basis for individual academic planning.
