Introduction

As an educational institution that strives to prepare students for successful careers, it is important to continuously evaluate the post-graduation status of Northwest Missouri State University's graduates. Career Services surveyed the previous academic year (summer, fall, spring) graduates and organized the data to provide Northwest stakeholders with a near accurate view of "first destination" employment and continuing education statistics. The data reported is six months after graduation (industry standard).

Methodology

Information Collected

Graduates are initially asked to verify general demographic information. All changes are forwarded to and processed by the Registrar for future interactions with them as alumni clients. In the second section of the survey, candidates share their post-graduation status (employed, continuing education, seeking employment or other). If the graduate indicates an employed status, he or she is asked to indicate the job title, name, address of employer and starting salary. Graduates continuing their education are asked to disclose the program of study and institution they plan to attend. The "other" category includes individuals actively choosing to neither seek employment nor continue their education. Internship participation is also collected gathering name of employer, location and experience satisfaction. Career Services continually attempts to contact all graduates disclosing a "seeking" status to offer job search assistance.

Data Collection Method

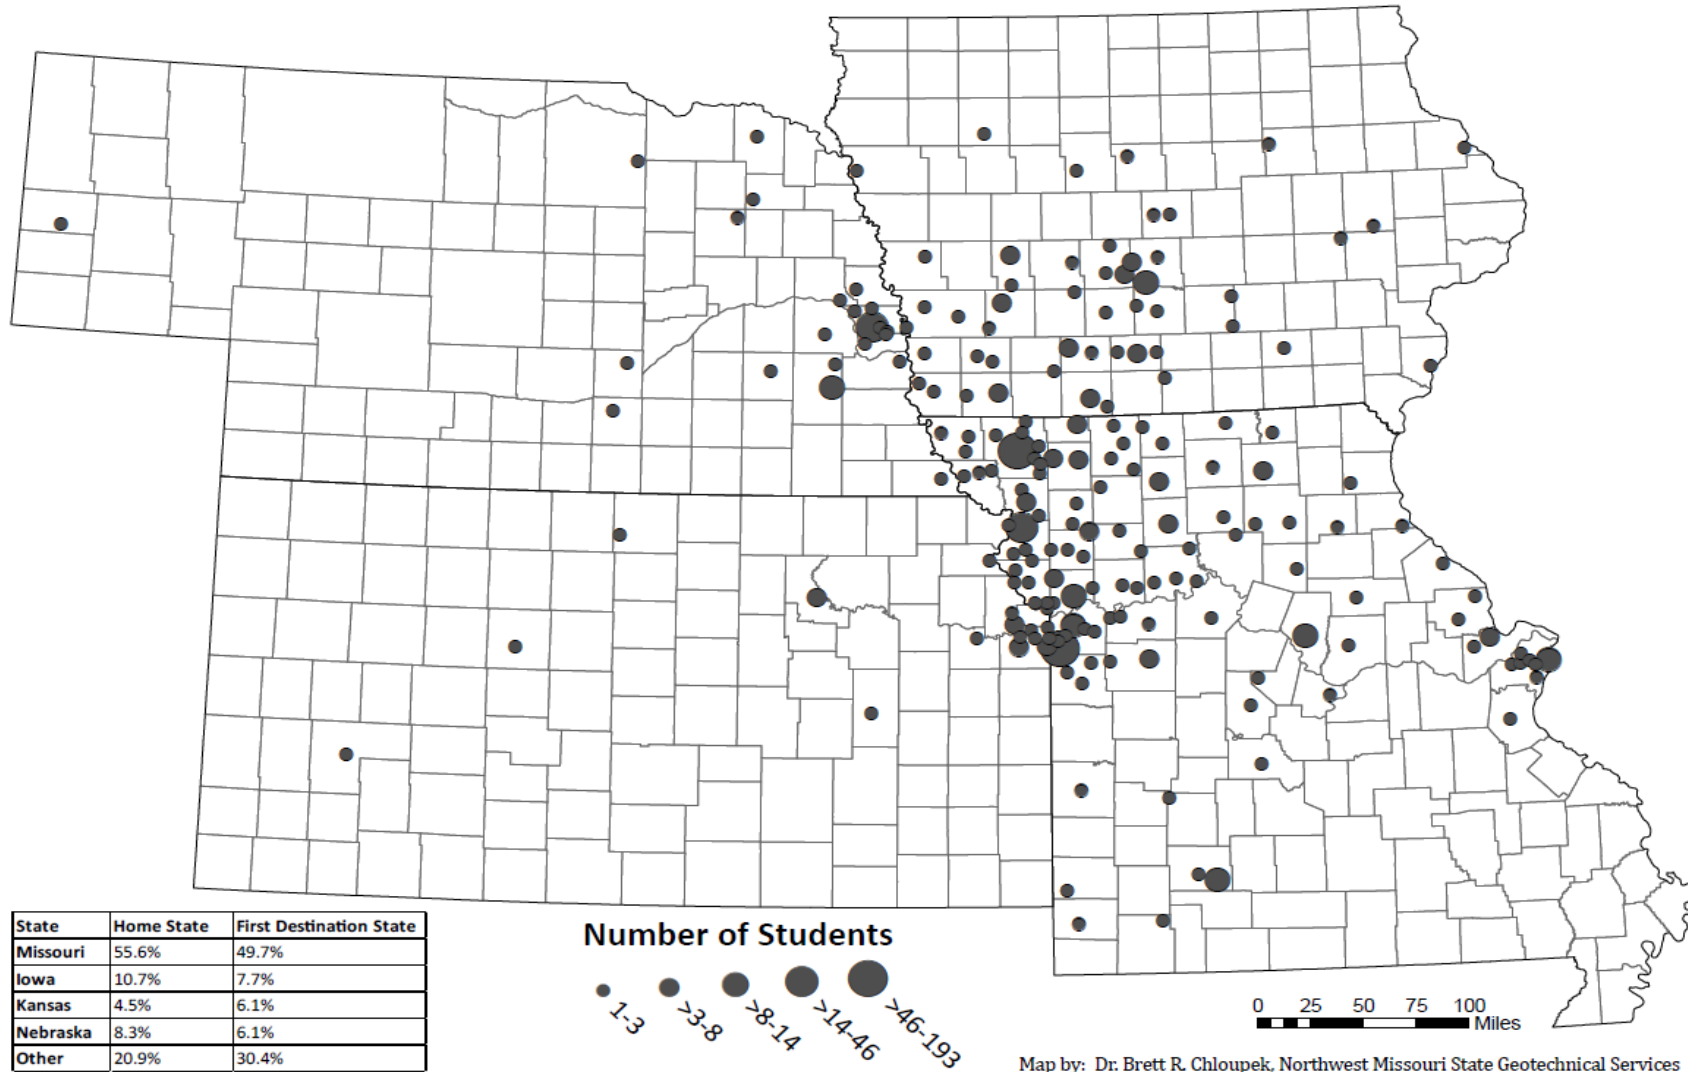

The placement information contained herein was obtained through an extensive six-month process. The process was initiated prior to "cap & gown" pick-up with an email asking graduates to complete an online survey. A hardcopy document is available at "cap & gown" and supplemented with another email to online only graduates and those not participating in the graduation ceremony. For those graduates not captured at commencement and for those who had previously indicated they were seeking employment, a follow-up email is sent at four months. If no response is received by six-months post-graduation, an effort is made to connect via two telephone attempts. Career Services conducts social media research prior to sending an email to faculty members in the event the new graduate has shared post-graduation data with him/her. Nonparticipants in all aforementioned steps are considered "no responses" and are not calculated into the report.

Data Analysis

Undergraduate and Master degree data were analyzed separately. The data is further divided by college/school, department and major. Totals are calculated for each major, department and college for the entire academic year. In accordance with FERPA guidelines, graduate responses are reported without disclosing the individual's identity.

Applied Health/Sport Sciences	Health is a life lesson. Learn the body, you can take that with you everywhere, for any job. This is a big skill. Learn about the body.

Health and Physical Education	Be employable. Some folks will tell you that PE teachers are a dime a dozen and you'll never get a job. Complete BS. Be employable: on time or early, do more than required, make lesson plans before practice plans, take criticism, don't leave until you have everything ready for the next day, be in shape or get in shape(unhealthy PE teachers set a bad example).
Recreation	Don't get an internship unless you get it paid - make connections.
Sport & Exercise Psychology	Make connections while in school.
Sport & Exercise Psychology	Make sure you are good at more than one thing.
