"We chose to look at Horace Mann after hearing about its reputation for academic excellence. We knew it was the right school for us after seeing the classrooms and the environment for learning. We have continued to stay because the education our children receive is worth the tuition we pay. The teachers have all adapted to meet their needs. The individual attention from classroom teachers, graduate assistants and practicum students is something that no other school can offer our children."

-Scott Yocom

Why Choose Horace Mann Laboratory School?

Families choose Horace Mann as the learning environment for their children for many reasons.

- Low student-to-teacher ratio
- Innovative and interactive teaching practices
- Individualized instruction
- State-of-the-art technology
- Rigorous, rich and varied curriculum focused on educating the whole child
- Access to University programs and activities
- Diverse population
- Opportunities for learners with special educational needs
- Opportunities for children to explore academic and non-academic gifts
- Shared studies (art, vocal music, instrumental music, physical education, Spanish, sign language)
- Active, engaged parents
- Opportunities for student leadership and service learning
- Dedicated and caring faculty, staff and administration
- Emphasis on character education
- Community of learners that spans from pre-Kindergarten students to adults

Academic Programs

Horace Mann provides academic programs for children in preschool through sixth grades. Preschool, pre-kindergarten and kindergarten classes are housed in the newly-created Leet Center for Children and Families located within the Horace Mann school building.

University practicum students work with the master teacher to instruct children in literacy, math, science and social studies. Daily instruction occurs in both whole class and small group settings using a variety of innovative instructional best practices.

No two children learn in the same way or at the same pace. At Horace Mann, the academic program strives to meet the unique learning needs of each child. Academic programs are constantly modified and adjusted to meet these needs. Learners with special learning needs receive specialized instruction from a highly qualified teacher.

Shared Studies

Each week students participate in a variety of shared studies courses. Students spend 90 minutes each per week studying physical education, art and vocal music. Students also receive 60 minutes per week of instruction in Spanish. Sign language and instrumental music are also part of the shared studies curriculum.

What is a ‘Lab School’?

Laboratory schools provide the environment in which best practices in education flourish and innovative research projects begin. Laboratory schools provide students the opportunity not only to learn from master teachers but to participate in cutting-edge instructional practices.

The Horace Mann Laboratory School serves as a clinical teaching environment for students in Northwest’s Department of Professional Education. Horace Mann is a learning community of children, families, master teachers, administrators, support staff, practicum teachers, graduate assistants and faculty members.

“My children are thriving at Horace Mann. My daughter, who is 7, will sit and read or do math problems at home just for fun. I think that this is in large part because the faculty and students who work at Horace Mann have a passion for education that translates to ‘learning is fun.’ My son, who is 5, is constantly asking questions and formulating answers, much like a young scientist would. When my children struggle, they receive extra help. When they excel, the faculty at Horace Mann provide advanced exercises designed to challenge them and expand their knowledge in a meaningful way.”

-Aaron Johnson
