3. HAZARDS IDENTIFICATION

GENERAL: Brass alloys in their usual solid form and under normal conditions do not present an inhalation, ingestion, or contact health hazard or fire or explosion hazard. Operations such as welding, brazing, burning, grinding, cutting, heat treating, machining or similar operations may generate dusts, fumes and machine turnings that may create a health or fire or explosion hazard.

ROUTES OF ENTRY: None in its natural solid state. High concentrations of dusts or fumes may cause irritation to the eyes. Inhalation of metal fumes or dusts generated during welding, burning, grinding or machining may cause irritations of the respiratory tract. Flu-like symptoms such as fever and chills may occur a few hours after excessive exposure. Dusts or fumes can cause irritation to the skin with itching, dermatitis may occur.

TARGET ORGANS: Respiratory system, kidney, liver, central nervous system, eyes and skin.

EFFECTS OF ACUTE EXPOSURE TO MATERIAL: COPPER & ZINC (as Oxide): Inhalation overexposure to copper or zinc oxide may cause metal fume fever characterized by fever and chills (i.e. flu-like symptoms) which appear 4-6 hours after exposure with no long-term effects.

EFFECTS OF CHRONIC EXPOSURE TO MATERIAL: LEAD: Chronic exposures may cause lead poisoning that can affect the digestive system, nervous system, reproductive systems, muscles and joints. IARC lists lead and its inorganic compounds under its Group 2B category - “possibly carcinogenic to humans”.

TIN: Inhalation overexposures may cause a benign pneumoconiosis (stannosis) with few or no symptoms, which is reported not to be disabling.

NOTES:
- International Agency for Research on Cancer (IARC) - Summaries & Evaluations (2008).
- 3rd Annual Report on Carcinogens as prepared by the National Toxicology Program (NTP).

4. FIRST AID MEASURES

EYES: FLUSH EYES WITH PLENTY OF WATER FOR AT LEAST 15 MINUTES, HOLDING EYE LIDS OPEN. SEEK MEDICAL ATTENTION IF EYE IRRITATION PERSISTS.

SKIN: MAINTAIN GOOD PERSONAL HYGIENE. WASH AFFECTED AREA WITH MILD SOAP AND WATER. SEEK MEDICAL ATTENTION IF SKIN IRRITATION PERSISTS.

INHALATION: REMOVE TO FRESH AIR. CHECK FOR CLEAR AIRWAY, BREATHING AND PRESENCE OF PULSE. IF NECESSARY ADMINISTER CPR. CONSULT PHYSICIAN IMMEDIATELY.

INGESTION: RARE IN INDUSTRY. DUST MAY IRRITATE MOUTH AND GASTROINTESTINAL TRACT. IF INGESTED, SEEK MEDICAL ATTENTION PROMPTLY.

5. FIRE FIGHTING MEASURES

FLAMMABILITY CLASSIFICATION: Non-flammable. Will not support combustion.

MEANS OF EXTINCTION: Not applicable for solid product. Use extinguishers appropriate for surrounding materials.

**HAZARDOUS COMBUSTION PRODUCTS:**
At temperatures above the melting point, fumes containing metal oxides and other alloying elements may be liberated.

**UNUSUAL FIRE HAZARDS:**
Finely divided particles or dusts such as those produced during grinding may present an explosion hazard, and should be treated as a Class D combustible metal fire - use a use Class D fire extinguishers (dry powder or sand) for fires involving powders or dusts.

**SPECIAL FIRE FIGHTING:**
Do not use water on molten metal.

### 6. ACCIDENTAL RELEASE MEASURES

**LEAK AND SPILL PROCEDURES:**
Not applicable to brass alloys in solid state.

For spills involving fine dusts, remove by vacuuming or wet sweeping methods to prevent spreading of dust.

Do not use compressed air to clean spills of dusts. Avoid inhalation of dusts. Collect spilled materials into suitable labelled containers for disposal.

### 7. HANDLING AND STORAGE

**HANDLING:**
Operations with the potential for generating high concentrations of airborne particulates should be evaluated and controlled as necessary. Practice good housekeeping. Avoid breathing metal fumes and/or dust.

**STORAGE:**
Store away from oxidizers, acids and other incompatible materials.

### 8. EXPOSURE CONTROLS

**ENGINEERING CONTROLS:**
General or local exhaust during welding, grinding or other dust generating operations.

**PERSONAL PROTECTIVE EQUIPMENT:**
Dependent upon process being performed on material each operation must be addressed for suitable equipment.

**GLOVES (Specify):**
Wear gloves as required.

**EYES (Specify):**
Safety glasses or goggles as required.

**CLOTHING (Specify):**
N/A

**FOOTWEAR (Specify):**

**RESPIRATOR (Specify):**
If concentrations exceed established limits (up to 10X TLV) use NIOSH/MSHA approved particulate respirators (dust & fume or high efficiency dust & fume cartridge) when grinding or welding.

### 10. STABILITY AND REACTIVITY

**CHEMICAL STABILITY:**
Stable - Brass alloys are stable under normal storage and handling conditions.

**HAZARDOUS POLYMERIZATION:**
Hazardous polymerization cannot occur.

**INCOMPATIBILITY TO OTHER SUBSTANCES:**
Yes. Oxidizers, acids, acetylene, some halogenated compounds.

**CONDITIONS OF REACTIVITY:**
Contact with oxidizers and/or strong acids will release flammable hydrogen gas.

**HAZARDOUS DECOMPOSITION PRODUCTS:**
High temperatures can produce toxic metallic and/or metal oxide fumes (mostly Cu₂O & ZnO).
