THE NORTHWEST DIFFERENCE Early Childhood Education majors at Northwest are certified to teach children birth through third grade in multiple settings including public and non-public schools, homes, and other community settings. Using a strengths based approach, faculty focus on child centered and culturally sensitive practices. Teaching methodologies include strategies to engage students and plan effective lessons, and classroom management that establishes positive relationships. Students in the School of Education participate in multiple hands-on experiences to ensure they are career-ready upon graduation.

CAREER OPPORTUNITIES 100% of students who graduate with the early childhood education degree obtain employment or continue their education within six months after graduation. *Based on self-reported data in recent years.

PROFESSION-BASED LEARNING EXPERIENCES

Early childhood education majors get experience in the classroom during their freshman year. The School of Education is dedicated to ensuring students are career-ready and prepared for the first day of school.

Freshman-year **observation** provides students an opportunity to observe a professional teacher for 15 hours during their first year. Students interact with professionals in the field, and learn the operations of a classroom and effective teaching practices. During a student's sophomore year, students participate in a **field experience**, during which they outline a unit plan and teach lessons. During the junior-year **practicum experience**, students spend 90 hours in the classroom, teaching lessons, integrating technology and literacy, engaging in learning strategies and using assessments to guide education. The senior-year **student teaching** involves students in preparing lessons and teaching in a classroom for 16 weeks during their final year. [Horace Mann Laboratory School](#) and [The Phyllis and Richard Leet Center](#) are clinical teaching environments on the Northwest campus to gain profession-based opportunities and skills. Horace Mann is one of a small number of laboratory schools in the United States, and provides hands-on, project-based learning for students to ensure they are career-ready upon graduation.
